

## TESTIMONIALS....

"I love this stuff. I have an 18 year old draft who was kind of a throw-away because of his knees. Now he is great and thinks he is five again. We also have an old paint mare who now gets around like a colt. We are passing this product on to our friends. It really does work great. Keep up the good work."

"I ordered some of your EASYGAIT supplement on *ebay* about three weeks ago. I absolutely LOVE it. It has worked miracles in just a short time. I went on your website to order another bag. Thank you so much for this product. I have spent a lot of money over the last four years trying to help my dear old friend and this product, in just a couple of weeks, has him running and even trying to buck and play! Two weeks ago he could barely walk around! It's amazing. Thank you so much."

"First of all I want to say thank you for making such a great product. I recently started using it on my three year old TB gelding who came to me with sore joints in all four legs to the point where he wouldn't trot or canter. Within three weeks he was trotting again and now (six weeks later) he has a normal set of pain-free gaits including a lovely long-strided trot. Thank you."

### GOOD FOR DOGS, TOO

"I must tell you that we are so pleased with the way our dog has responded to your product. He's a different dog than he was six months ago. He was getting very arthritic and was limping quite a bit. Now I have to put on rollerblades and let him run three miles before he's tired. It's truly amazing."

## FROM US TO YOU -- DIRECTLY

- We keep processing, packaging, simple.
- We have no overhead or middleperson.
- No fillers or additives. 100 % pure active ingredients.
- Formulated by scientists with expertise in biology, nutrition and medicine.

**Our goal is to make a high quality joint supplement more affordable for more horse and dog owners.**

### How to Order:

**If you would like to order**

**EASYGAIT, go to**

# EASYGAIT

## JOINT SUPPLEMENT

.....for horses and dogs

**Horse daily dose:** 4 teaspoons.

Contains: 9600 mg glucosamine sulfate, 4000 mg MSM, and 4600 mg of Vitamin C. Our one pound bag contains 25 daily doses, and costs a total of \$0.85 per day (includes shipping). This high potency dose is the amount used in clinical studies that show a real benefit to the horse. It is a higher dose at a lower daily cost than any other supplement we could find – especially if you include shipping! It is also available in three and ten pound bags for even better savings.

**Dog daily dose:** ¼ teaspoon for every 30 pounds of body weight.

## Dear Horse and Dog Owner:

We love our animal companions. We want them to be healthy, happy and to be able to perform well. Scientific evidence convinces us that certain nutritional supplements can be very effective for treatment of joint pain in both humans and animals. In the short term, some supplements relieve pain and inflammation. Over time, supplements may also offer protection to the structure of the joint itself.

Like many horse and dog owners, we have seen significant improvement in our own animals using appropriate supplements. It is no accident that supplements are a huge business. But we are appalled by the markup for joint supplements. After much research, we have found a way to keep the cost down... by purchasing ingredients at bulk discounts. We also reduce costs by preparing EASYGAIT ourselves, keeping the actual work at 'cottage industry' level. We have no overhead, we do not advertise, our packaging is simple and we avoid credit card bank charges. The result is a high quality, high potency supplement available to all our horses and dogs at the lowest possible price.

# EASYGAIT

## JOINT SUPPLEMENT

....for dogs and horses

### About Our Supplement:

Our mix is simple and we believe it is effective. There are many complex supplements on the market that add extra ingredients. These "extras" may actually interfere with each other and diminish the overall effectiveness of the supplement. Many supplements use such a small amount of active ingredient that they cannot be very effective. Our supplement is pure and only contains active ingredients.

### The EASYGAIT Formula:

Our joint supplement is based on what we believe is the best scientific information available. EASYGAIT supplement combines glucosamine sulfate, MSM and Vitamin C.

- We use glucosamine sulfate instead of glucosamine HCL because most studies have been done with the sulfate form. Many experts believe that the sulfate portion of glucosamine sulfate is critical since it forms part of the structure of cartilage.

- We do not include chondroitin sulfate because it is not needed. Chondroitin is similar to glucosamine, but not as well absorbed. The sulfate in chondroitin sulfate is important for cartilage structure, but is already included in the glucosamine sulfate molecule.

- We do not include HA (hyaluronic acid.) HA is very effective when injected, but there is little evidence that it works as well when given orally, and no evidence that it is better than the ingredients found in EASYGAIT.

- We will keep abreast of current studies and change our formula when and if the science dictates.

- If you would like more information on the quality of our supplement, we can send you the certificate of purity/analysis that comes with each batch we order. **Scientific studies:** We have prepared a summary of the scientific studies and expert opinion we use to formulate EASYGAIT supplement. References to the original studies and articles are included in our review. You will find this information on our website:
